

TAC SHIELD

PRECISION "HANDS-FREE" RIFLE SLING

Precision Tac-Grip™ Rifle Slings

PRS Tac-Grip Slings solves the age-old problem of keeping your rifle securely on your shoulder. There are two models offered... Traditional and Hands-Free, AMERICAN MADE!

Our Traditional Sling starts with the Comfortable Shoulder Pad, designed with our laser cut Laminated Cordura® and blended with closed cell foam and Non-Slip Tac-Grip material. This system offers Extra Strong Gripping Power in wet/dry conditions and works great with technical clothing materials.

The PRS Sling Series is enhanced with Fast Adjust to tighten the sling for Steady Shooting. All slings include stud swivels.

Precision "Hands-Free" Rifle Slings

"HANDS-FREE" Rifle Slings offers choices for extra control during rigorous use. Choose between over the head **Neck Strap Carry** or engage full **Body Strap Carry**. Once engaged, press the Quick Release and rotate firearm into the shouldered position for shooting. The Fast Adjust Slider can be easily engaged for a tight and secure shot.

NECK STRAP: Quickly pull the Military Grade Elastic Strap over your head for secure walking or quick two-handed tasks.

BODY STRAP: Loosen body strap, pull the strap over your shoulder for cross-body carry. This supports Climbing, ATV Riding, Decoy Carry or Game Retrieval (always use with an empty chamber).
